ELECTRIC MOBILITY FOR ALL

As forerunners of electric mobility, Renault benefits from a decade's experience in the design, manufacture, sales and after-sales servicing of electric vehicles. Renault was the first to believe in 100% electric mobility and continues to lead the way today. Our electric cars remain the most prevalent on European roads, totalling over 20% of all electric vehicles driven throughout the continent with more than 400,000 electric vehicles sold.

Today, Renault offers one of the largest choices of electrified models. From the fully electric Megane E-Tech 100% electric and Zoe capable of up to 280 and 239 miles of electric range respectively, to the technologically advanced Clio, Captur & Arkana E-Tech full hybrid and Captur plug-in hybrid offering low running cost, reduced tailpipe emissions and improved driving experience.

With electric, full hybrid and plug-in hybrid options on our most popular models, you now have more choice than ever, wherever you are on your journey to full electric mobility.

Please speak to your local Renault dealer to try our latest electric and hybrid products.

Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP fuel consumption and CO₂ figures are used to calculate Vehicle excise Duty on first registration and Company Car Tax Benefit in Kind. For more information on CO₂ banding and Company Car Tax Benefit in Kind go to www.cartax.renault.co.uk. Please visit renault.co.uk/configure for WLTP figures for any selected options.
